

DeFAI Mint

Mint to DeFAI. Vibe Trading as NFT.

"Mint once. Let AI do the rest."

"Making Solana the end point of financial and human history."

DeFAI NFT = AI Agent + Wallet + Signer

- Coliseum Breakout Hackathon 2025
- Track: DeFi , Consumer Apps , AI

MARKET & ISSUES

Crypto Investing > Human Capacity

"Users overwhelmed by information, not empowered."

140,000+

new tokens/day

Thousands of protocols

= UX fragmentation

Hundreds of new L1/L2

blockchains/year

Volatility from

political & social events

**DeFi × AI – DeFAI – is a burning need for crypto users.
The last piece Web3 needed.**

PROBLEM

DeFi × AI: Unfair & Immature

"In DeFi, AI tends to reinforce—rather than reduce—existing inequalities."

AI: The Great Equalizer?

Since ChatGPT, AI has become mainstream and is closing skills gaps across domains (coding, design, writing etc.)

In Crypto: AI Widens the Gap

However, in DeFi × AI, knowledge gaps are widening rather than narrowing

Unequal Access, Unequal Outcomes

Experts optimize with AI while beginners struggle with complex tools, falling further behind

DeFi × AI is still immature—AI benefits remain unevenly distributed.

SOLUTION

DeFAI Mint: AI Agent as NFT.

"DeFAI is Vibe Trading — the simplest way to invest in crypto."

1

Mint an NFT

Pick a belief. Mint in one click.
That's it. No wallet setup.
No approvals. No complexity.

2

Your NFT = Your AI Agent

It holds its own wallet, signs on its own, and trades for you — fully autonomous, fully on-chain.

3

You Stay Present. It Trades.

While your agent invests across chains, you stay focused — on work, life, and what matters.

**DeFAI Mint reduces DeFAI to a single action: minting an NFT.
That NFT becomes your wallet, your signer, and your AI agent.**

HOW IT WORKS

DeFAI Mint: Trade What You Believe

"Mint your beliefs. Stake your future."

	● Trump Bet NFT	● Solana Forever NFT
strategy	High-risk, narrative-driven memecoin sniper	Long-term, Solana-maxi conviction investing
behavior	Monitors Trump's social posts, auto-trades \$TRUMP / \$MAGA	Buys/stakes SOL, allocates to Jito, Jupiter, MarginFi
belief	Betting on Trump's influence as a market mover	Solana as the endgame infrastructure
target	Political bettors, memecoin traders	SOL believers, DeFi yield farmers

DeFAI lets you invest in what you truly believe – from politics to protocols.

FEATURES

NFT as Safety Layer – Don't Fear the AI.

“Letting AI manage my money feels risky... even scary.”

Mint Price = Trading Budget

No overexposure. Your risk stops at what you mint.

Self-Contained Wallet as NFT

As an NFT, the DeFAI Wallet operates independently from your wallet.

NFT as Middleware Between You and DeFi

You never interact with DeFi protocols or approvals directly.

Emotion-Free Execution

AI trades rationally—unaffected by fear, greed, or panic.

In DeFAI Mint, risk is minimized – your NFT thinks, holds, and signs for you

FEATURES

Effortless UX – for both Web2 and Web3 users

"No wallet? No \$SOL? No problem."

No Wallet Required to Mint

Users can mint without a Solana wallet—Twitter login is all it takes.

No \$SOL Required to Mint

Cross-chain supported.
You can mint even without any SOL.

Full On-Chain Transparency

Every trade by the AI agent is on-chain—fully visible, verifiable, and honest.

Zero User Interaction Post-Mint

Once minted, the agent operates independently—no further action required.

**We obsess over every detail of the user experience –
from Twitter login and Privy-powered wallets, to cross-chain minting with no \$SOL required.**

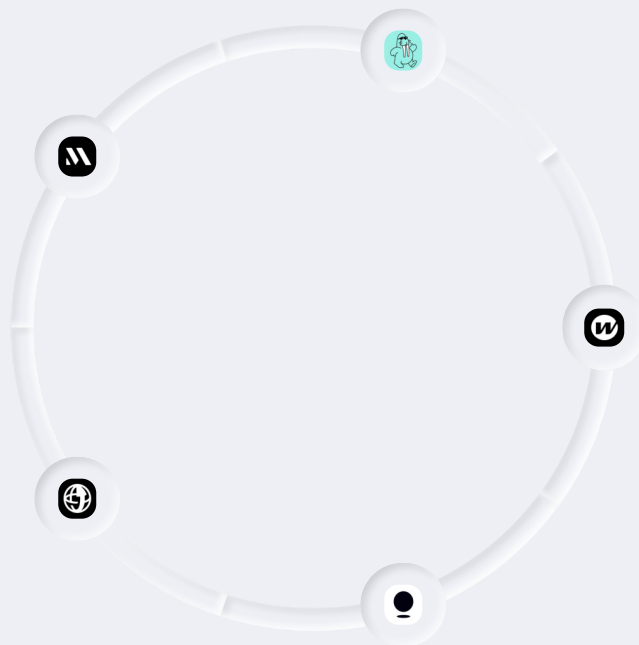

Inside DeFAI Mint: Modular. Executable. Solana-Native.

NFTFi Protocol: [Metaplex Execute](#)

Turns NFTs into self-custodied, executable AI agents — each holding its own private key and signing transactions autonomously.

AI Infrastructure: [Solana Agent Kit v2](#)

Purpose-built for on-chain autonomous AI agents.

Persistent Storage: [Walrus](#)

Fast, persistent decentralized storage for agent memory and logs.

Interoperability Protocol: [Wormhole](#)

Handles seamless cross-chain transactions behind the scenes.

Wallet Abstraction: [Privy](#)

Enables seamless wallet creation via social login —
no browser extension required.

NFT = DeFAI Agent — made possible by Solana.

Why We Chose Solana? Inevitable.

Strong User Base

The most successful L1 in real-world business adoption—trusted by millions.

Builder-First by Design

No L1 supports builders more—with tools, funding, and ecosystem incentives.

Optimized for Consumers

The only L1 truly suited for high-performance, UX-centric consumer apps.

Scalable and Cost-Efficient

Handles massive transaction volumes—fast, cheap, and reliably.

Mature Technical Ecosystem

From Metaplex to Agent Kit, Solana brings together best-in-class infrastructure.

Only Solana offers the execution, scalability, and developer stack DeFAI demands.

VISION & IMPACT

Democratize the benefits of AI.

"DeFAI Mint bridges belief and capital—unlocking autonomous finance for all."

100x

user growth on Solana

10,000x

Tx growth on Solana.

∞

DeFi x AI Possibility

**Solana is the final application layer — where finance meets belief.
Vibe Trading starts here.**

APPENDIX: FOUNDER PROFILE

Kyohei Ito / Founder, DeFAI Mint

- A leading contributor to Japan's Web3 ecosystem and developer education.
- Former CTO and VPoE at multiple Web3 startups in Japan.
- A full-stack founder, developer, and strategist with a consistent track record across core Web3 domains, including L1/L2, NFT marketplaces, NFTFi, token issuance, stablecoins, audits, and developer marketing.

APPENDIX: FOUNDER PROFILE

Career & Portfolio

Project Highlights

- Co-led "TOMIE by Junji Ito" NFT with Yomiuri TV & Netflix (130 ETH), plus 10+ NFT launches
- Led Bunzz Enterprise, built Bunzz AI Audit, contributed to \$4.5M Seed round
- Head of Solution Architect at DA Layer(L1) – created 3 App Chain use cases
- Thirdweb Meets Tokyo, Hyper Parallel Tokyo (Arweave / AO), AO Bootcamp, Web3 New Year's Event in 2024 presented by Bunzz & Ripple etc.

Solana Involvement

- **1st Place – SendAI Prize** at **Trend Hack (AI Agent category)**
- **Contributor** at **Superteam Japan**
- **Co-Founder** of **SendAI Japan**
- Joined Winter Arc Matsumoto

SUMMARY

DeFAI Mint | Overview

"Mint an NFT. Let it invest. Live your life."

WHY | The Problem

AI × DeFi today empowers the few.

Technology amplifies gains — but only for the privileged.

The result? A widening wealth and knowledge gap.

HOW | Our Approach

NFTs as the gateway to Vibe Trading.

DeFAI Mint abstracts complexity through agentized automation and intuitive UX.

No wallet setup. No technical friction.

WHAT | Our Stack

Built on Solana.

Engineered for execution.

We leverage:

Solana Agent Kit v2, Metaplex

Execute , Wormhole, Walrus

DeFAI Mint bridges belief and capital—ushering in a new financial era.

ENDING

Let's Mint to DeFAI.

"Making Solana the end point of financial and human history."
